HDH-4X0 Half Duplex Handset Station

Description

The HDH-4X0 Half Duplex Handset Station allows the user to either talk or listen with a master station. These units are ruggedly constructed and include an armored handset cable with a strain relief on each end.

The HDH-4X0 includes a magnetic in the cradle hook switch.

Half duplex handset stations are powered through the audio lines that are connected to the SAB-400.

Features

- half duplex audio channel
- hearing aid compatible
- switch closures, power and audio use a single two 2-wire shielded cable
- hook switch sends automatic call request signal
- heavy-duty brushed stainless steel faceplate
- rugged cable strain relief
- rugged metal handset cradle
- impact resistant handset
- depluggable MTA100 series connectors eliminate wire stripping during servicing and installation
- mounts on standard 2 gang or 3 gang electrical boxes
- compatibility with all standard #6-32 mounting hardware allowing any type of security screw to be used
