Local Zone Annunciator Enclosures

Often fire alarm applications call for LED type annunciation, and in some cases, control functionality located remotely from the fire alarm control panel. In these circumstances, it is essential that the annunciator be fully supervised, adequately protected in a locked enclosure and be attractive in appearance. With these requirements in mind, Advanced developed its AX-LZACAB series of enclosures

The AX-LZA-CAB series enclosures provide superior flexibility and customization to an Axis AX Series Intelligent Fire Alarm Control Panel installation, the enclosures (AX-LZA-CAB1 and AX-LZA-CAB2) provide for remote usage of Advanced switch LED modules, AX-ASW-16, AX-I/O-48, AX-LED16RY, AX-LED32R and AX-LED32Y. Available in two (2) configurations, cabinet styles 1 and 2, and four (4) model types for gray and red color, the AX-LZA-CAB series enclosures can accommodate any remote LED annunciation and/or control requirement.

The AX-LZA-CAB1 Local Zone Annunciator Enclosure is designed to hold a single Advanced switch LED module.

The AX-LZA-CAB2 Local Zone Annunciator Enclosure is designed to hold up to two Advanced switch LED modules. Within this enclosure, modules can be mixed and matched to suit the installation application.

The AX-LZA-CAB1 and AX-LZA-CAB2 enclosures are designed to be surface or semi-flush mounted with optional trimming (AX-LZA-CAB1-TR or AX-LZA-CAB2-TR). In addition, the enclosures can also be mounted to a 4" double gang electrical box and are available in either red or gray color.
