

Description

The HMX MP and DP panels operate with any Fire Alarm Control Panel (FACP) and provide 25, 50 or 100 Watts of speaker power. The Voice Master and Distributed Panels (VMDP) has its own power supply and battery charger. The Panel must be wired with 120 or 240 VAC and standby batteries connected. The HMX panel is housed in a surface or semi-flush mounted backbox with a hinged and key locked door.

The HMX-MP Master Panel (HMX-MP) utilizes a Master Mic control with 16 switch control points along with a dual channel DMR and a high-speed communication loop. Maximum system configuration allows up to 1,000 switches/ input points, and an integrated fire phone is available as an option.

The HMX-DP Distributed Panel has 4 output zones available and can be configured for 8. The panel has dual channel audio interface and dual (25/50/100W available) or single (25/50/100/200W available) channel amplification options. An integrated Fire Phone is optional, as well as 4 circuits expandable to 8, 12 or 16 with a maximum system configuration of up to 256 HMX-DP panels.
